

Eduroam via iMac or MacBook

This quick reference describes how to configure your iMac or MacBook for automatic connection to the eduroam Wi-Fi network. Eduroam is available worldwide in many higher education organisations.

Connect with eduroam

This method uses the eduroam cloud installer. For this method a connection with the internet is needed. For instance, via an existing wifi-network, such as Leiden University (log in with your ULCN account). You also have to be within reach of the eduroam network.

1. Use Safari or another browser to go to <https://cloud.securew2.com/public/13114/eduroam/>. This is the eduroam cloud installer, that recognizes your operating system (iOS) and confirms this in a window like this:

2. Make sure that *Configure via dissolvable Agent* is selected and click [JoinNow]. A file *SecureW2_JoinNow.dmg* is downloaded.

3. Start the installation by opening *SecureW2_JoinNow.dmg*. The application's icon looks like this:

SecureW2 JoinNow

4. Double click the icon to open the SecureW2 JoinNow login window:

A screenshot of the SecureW2 JoinNow application window. The window title is "SecureW2 JoinNow". It features the Universiteit Leiden logo and name. Below the logo, there is a text prompt: "Voer uw gebruikersnaam in als user@leidenuniv.nl". There are two input fields: "Gebruikersnaam:" with the value "ULCN-account@leidenuniv.nl" and "Wachtwoord:" with masked characters "*****". A checkbox labeled "Toon Wachtwoord" is below the password field. At the bottom, there is a progress bar with three stages: "CONFIGUREER" (highlighted), "AUTHENTICEER", and "VERBONDEN". Below the progress bar are buttons for "Help", "Volgende", and "Annuleren".

5. Enter your ULCN username, followed by @leidenuniv.nl (like johnsonj@leidenuniv.nl) and then click Volgende/Next. The Mac now asks your local password for system setting changes:

A screenshot of a system password prompt dialog box. The title bar says "SecureW2 JoinNow wants to make changes. Type your password to allow this." There is a lock icon on the left. Below the title, there are two input fields: "Username:" with the value "admin-account" and "Password:" with masked characters "*****". At the bottom right, there are "Cancel" and "OK" buttons.

6. Enter your local username and password and confirm with [OK]. The connection with eduroam is established and this is confirmed as follows:

7. Click *Done* and you are connected with eduroam. By default, your Mac will now connect to eduroam whenever it is available. Not only at Leiden University, but also in many other higher education organisations in the Netherlands and abroad.
